

Our Services

Reapers is a community and networking platform built for gamers and game developers in Pakistan and beyond. Here's what we offer:

1. Community Chatrooms

Join topic- and game-based chatrooms to talk with other gamers and developers in real time, or connect with existing gaming communities like CEGA, IGDA, PIGD, PGDA, and Pakistan Game Dev — all in one place.

2. Direct Messaging

Message other users one-on-one to network, collaborate, or just talk games — separate from group chatrooms.

3. Community Building

Create and manage your own community or chat room, invite members, and grow a space around your game, studio, or interest.

4. Event Discovery & Hosting

Discover and RSVP to gaming events — watch parties, indie developer meetups, tournaments, and workshops — or post your own, whether online or in-person.

5. Game Demo Showcase

Upload short gameplay demos of your project, browse demos from other developers, and get structured feedback and reviews from the community.

6. Team Hiring & Matchmaking

Find teammates for your game-development project by posting your requirements and sharing your demo — or browse open listings to join a team that needs your skills.

7. Expert Guidance Sessions

Book short 10–15 minute sessions with verified industry experts to get feedback, mentorship, or a review on your game or project.

8. Developer & Gamer Profiles

Build a public profile and portfolio showcasing your skills, past projects, and demos — so other developers, gamers, and experts can find and connect with you.

Reapers brings community, events, feedback, and mentorship together in one platform — built for the people making and playing games.
